First Trial of Kaizen Foam

Finished Goods Inspection Station - *Before*

- Pens, utility knives, scissors and other items thrown inside cardboard tube.
- Calipers inside red box that has to be unclipped and opened each time.
- Cannot tell when something is missing.

Finished Goods Inspection Station - *After*

- Eliminated some unnecessary items.
- Can see when something is missing.
- Safer with blades pointing down into foam.
- Operator made this himself after watching Fastcap video and really enjoyed the process!

Finished Goods Inspection Station - *After*

- Operator is much happier with how the workstation looks. (Will remove the tape that is no longer needed.)
- Other Operators are excited about making their own organizers and improving their desks and workstations!

**Enjoy the fun of
improving your
lives!**
